

MAXIM DEFENSE M-RAX™ RAIL SYSTEM

M-RAX™

M-RAX RAIL SYSTEM

Introducing the new M-RAX™ attachment system by Maxim Defense. Unlike the traditional M-Slot mounting systems, M-RAX™ utilizes the full slot of your rail, maximizing space. This makes the M-RAX™ system end-to-end stackable, giving you the option to create seamless monolithic rail sections where needed.

Installation and removal is a breeze. Thanks to the spring-loaded screws, the M-RAX™ system removes mounting frustrations. Simply push the screw in with a standard hex tool and rotate 90 degrees. The locking lugs engage that easily. No more fighting or timing screws. Just push, turn, and tighten.

M-RAX
SPECIFICATIONS

FITS:	Compatible with all M-Slot handguards and forends
LENGTH/WEIGHT:	2 • M-Slot (3.145") / 1.54oz 3 • M-Slot (4.720") / 2.31oz 4 • M-Slot (6.295") / 3.09oz 5 • M-Slot (7.870") / 3.87oz 6 • M-Slot (9.445") / 4.62oz
MATERIAL:	6061-T6 Billet Aluminum
FINISH:	Hard Coat Anodize type 3 Class 2 Available in black and FDE

- Easy installation and removal
- M-RAX™ sections meet M1913 specifications
- Patent Pending spring loaded universal interface system eliminates the need to adjust the gap between the T-Nut and accessory to match the thickness of the mounting surface. Simply use the supplied hex key to push the spring loaded hardware through the M-slot, twist 90 degrees to engage, release tension and then tighten normally.
- Secure mounting point for any picatinny rail-mounted accessories such as grips, lights, lasers, etc.

Spring-loaded screws for easy installation. Just push and turn 90 degrees.

Fully stackable end-to-end. No more unwanted gaps.
